Profile

Performance driven and quality conscious Carpenter with more than ten years' experience in framing, drywalling, roofing, repairing and installing woodwork structures. A specialist in outdoor mobile carpentry projects for events like conferences, shows, trade exhibitions, and international concerts. Sound knowledge of CAD software. Holds a Lead Carpenter Certification from the National Association of the Remodelling Industry and recently completed the U.S. Green Building Council's LEED Green Associate exam.

Employment History

Jan 2017 – Present

CHARLESTON

Master Carpenter Big Five Construction

Managing a team of 15 apprenticeship carpenters during ten mobile carpentry projects over the space of six weeks attaining a zero-incident safety rating and completing all projects four days ahead of anticipated deadlines.

- Manage remodeling projects for commercial and residential buildings
- Monitor all carpentry work done by the apprentices' team such as design, constructing, installation and repairs of decks, flooring, and balconies
- Involved in high-level construction inspection to ensure, fitting and repairing of wood fixtures, plywood, and wall boards are completed per state building codes and regulations
- Manage work schedules, payroll and invoicing
- Conduct marketing and promotion campaigns to attract new clients and upsell to current customers
- Create project estimates and time frames for projects
- Design custom fabrication blueprints to be approved by customers
- Manager carpentry team and provide direction regarding daily activities to be completed
- Apply for permits and inspections

Jan 2016 – Dec 2016

BORGER

Lead Carpenter Cementix Commercial Remodellers

Developed and online work scheduling app which assisted in collaborative communication between all contractors, supervisors and project administrators reducing scheduling confirmations between the client and company to less than 60 seconds, as opposed to 24 hours.

- Work on residential projects such as garages, fences, decks and other additions including installation, refurbishments, and maintenance

- Utilized blueprints and completed projects with hand, power, and air tools associated with carpentry
- Oversee tasks on mechanical, electrical and plumbing work
- Interpret blueprints and utilize hand, power and air tools to complete associated carpentry projects
- Supervise installation and trimming activities done by apprentice carpenters
- Record all safety incidents and report to senior management
- Advise clients on refurbishments and expansions

Jan 2014 – Dec 2015

DENVER

Apprentice Carpenter

Timberland Products

Negotiated new service level agreements with local timber suppliers which completely eliminated cross border delivery expenditure and increased cash flow resources by 25k per month.

- Participate in the demolition and clean-up of site debris after during and after installation activities
- Assist with the installation of doors, shelves, trimming and fixtures
- Prep sundries and carpentry tools for use by the Master Carpenter
- Read blueprints and schematics before cutting forms and models for concrete pouring
- Clean and prepare equipment and machinery
- On-loading and offloading of building and construction materials
