

# Kevin Boulder

Factory Worker

## Profile

*Task driven and methodical Factory Worker with eight years' hands-on experience in parts assembly of auto mechanical equipment. Has a proven track record of attaining a 100% product feed score for the last 28 weeks. Competent at adhering to OSHA workplace safety regulations and attained a Certified Mechanical Technician as well as Certified Welder qualifications in the last six months.*

## Employment History

### Food Factory Worker at ABC Sweets and Confectionary, Denver

January 2019 — Present

*Enhanced the finished product's quality by conducting vigilant manual scanning at three stages of the production process instead of just the final stage resulting in defective ratio's dropping by 34%.*

- Signal co-workers to guide them regarding the placement of pallets containing baking products such as flour, sugar, oil, and powdered eggs to be used during production and processing.
- Prepare raw materials for mixing and processing
- Conduct minor repairs to equipment and machinery such as replacing worn components or fixing damaged mechanical parts
- Position spouts and chutes of raw material storage bins so that food ingredient containers can be filled for automated mixing and processing to take place
- Clean and sanitize work areas, equipment, and machinery after each shift
- Deconstruct defective food products for reprocessing
- Ensure a constant supply of ingredients to be fed through to the mixing and processing machinery via the conveyor systems
- Operate machinery such as slicers and cutters when the machinist is on a break

### Textile Factory Worker at Borning Textiles and Garments, Cambell

September 2016 — December 2018

*Decreased machine shutdown cycles by 40% by increasing preventative maintenance schedules from once a month to one a week during factory downtimes.*

- Operate looming, knitting, braiding and looming machinery on a rotational schedule
- Carry material pallets containing fabric and threads to the designated work stations
- Fetch tools such as needle threaders, scissors and die mixing components from the storeroom
- Program and calibrate industrial sewing and weaving machinery

## Details

1515 Pacific Ave, Los Angeles, CA 90291, United States, (541) 754-3010

## Education

### ISA Certified Automation Professional (CAP), The International Society of Automation, Triangle Park

July 2018 — July 2019

### Certified Production Technician (CPT), Manufacturing Skill Standards Council, Alexandria

January 2017 — May 2017

### National Career Readiness Certificate, American Testing College (ACT), Iowa City

October 2016 — November 2016

### GED Diploma, West Side High School, Charlotte

December 2013 — December 2015

## Internships

### In-Service Apprenticeship at Aromax Chemicals, Louisville

October 2015 — December 2015

*Part of the line achieving a hundred percent of quality standards with no products being flagged for defects by the quality control department and still exceeding production targets by 130%.*

- Monitor pumps, valves and gauges to regulate the flow of liquids and air
- Mark and tag identification on parts of the boilers and steamers to indicate the ones requiring maintenance or replacement
- Dump materials such as organic chemicals and raw materials into machine hoppers before mixing and processing takes place
- Mix raw materials according to specified procedures or formulas before extrusion and extraction are to begin
- Record information of products tested, meter readings on machinery and dates and times of processing activities
- Review charts and gauge readings and compare with standard safety numerical values to determine that they are operating in the designated safety ranges according to OSHA

- Measure and grade products coming out of the feeding batches in comparison to standard specifications and quality standards
