## EMPLOYMENT HISTORY

Jan 2019 — Present **Lead Car Mechanic, High Performance Torquing** Los Angeles

*Served as lead Car Mechanic in a uber large workshop for Honda vehicles, training and mentoring five junior mechanics in diagnostic automation which improved service delivery times by 25%.*

- Perform frequent maintenance and status checks on vehicles and trucks
- Check and monitor and refill automotive fluids for example coolant, brake fluid, and oil
- Inspect air filters and fuel filters for debris and replace them if required
- Clean and lubricate engine components with each car service job order
- Inspect and diagnose electrical and mechanical malfunctions with manual and digital diagnostic tools
- Check and inspect electrical systems, batteries and vehicle timing logs
- Replace faulty parts and components

Jan 2017 — Dec 2018 **Auto Technician, Automate** Tampa

*Responsible for 15 job orders per day and holds a zero-call back ratio on all jobs completed in the last quarter.*

- Inspect and recalibrate brakes and replace when required
- Remove old sparkplugs and new ones
- Check for correct air pressure in tires, wheel alignment, and wheel balancing
- Tighten or replace screws nuts and bolts and dismantle engine components to look for malfunctioning parts
- Extract and remove faulty parts using pliers, screwdrivers, hydraulic lifts and wrenches
- Follow service specifications and instructions for each model and make of vehicle being serviced

Feb 2020 — Feb 2020 **Car Apprentice Mechanic, Oslo Auto Workshop** Cleveland

*Completed apprenticeship program two months faster than the standard training period for new mechanics*

- Reassemble repairable parts and install and fix new parts
  - Test that new parts are working before installation
  - Keep a record of all activities per job order
  - Document all repairs, parts replaced and labor hours
  - Clean and sanitize workshop equipment and tools
  - Create quotations for clients after vehicle diagnostics have been completed
  - Follow safety rules and protocols following company policies
  - Use required safety gear such as goggles, gloves and boots when handling dangerous machinery for example power tools, electric welding machinery, and hydraulic lifts
  - Keep a record of purchases of stock and equipment pieces and get approval from the workshop manager before orders are placed
-
