PROFILE

A dynamic and meticulous Car Mechanic holding a faultless track record in diagnostics and repairs for high-performance vehicles in the Formula One Circuit. Over a decade of experience in fixing and repairing Ferrari and McLaren model vehicles in highly pressurized settings. Holds a Diploma in Automotive Engineering and is certified as a Master Mechanic for brands such as Toyota, BMW, Audi, and Volkswagen. Strong work ethic with a verifiable record of providing exceptional customer service.

EMPLOYMENT HISTORY

❖ **Lead Car Mechanic, High Performance Torquing** Jan 2019 — Present
Los Angeles

Served as lead Car Mechanic in a uber large workshop for Honda vehicles, training and mentoring five junior mechanics in diagnostic automation which improved service delivery times by 25%.

- Perform frequent maintenance and status checks on vehicles and trucks
- Check and monitor and refill automotive fluids for example coolant, brake fluid, and oil
- Inspect air filters and fuel filters for debris and replace them if required
- Clean and lubricate engine components with each car service job order
- Inspect and diagnose electrical and mechanical malfunctions with manual and digital diagnostic tools
- Check and inspect electrical systems, batteries and vehicle timing logs
- Replace faulty parts and components

❖ **Auto Technician, Automate** Jan 2017 — Dec 2018
Tampa

Responsible for 15 job orders per day and holds a zero-call back ratio on all jobs completed in the last quarter.

- Inspect and recalibrate brakes and replace when required
- Remove old sparkplugs and new ones
- Check for correct air pressure in tires, wheel alignment, and wheel balancing
- Tighten or replace screws nuts and bolts and dismantle engine components to look for malfunctioning parts
- Extract and remove faulty parts using pliers, screwdrivers, hydraulic lifts and wrenches
- Follow service specifications and instructions for each model and make of vehicle being serviced

❖ **Car Apprentice Mechanic, Oslo Auto Workshop** Feb 2020 — Feb 2020
Cleveland

Completed apprenticeship program two months faster than the standard training period for new mechanics

- Reassemble repairable parts and install and fix new parts
- Test that new parts are working before installation
- Keep a record of all activities per job order
- Document all repairs, parts replaced and labor hours
- Clean and sanitize workshop equipment and tools
- Create quotations for clients after vehicle diagnostics have been completed
- Follow safety rules and protocols following company policies

- Use required safety gear such as goggles, gloves and boots when handling dangerous machinery for example power tools, electric welding machinery, and hydraulic lifts
- Keep a record of purchases of stock and equipment pieces and get approval from the workshop manager before orders are placed

EDUCATION

❖ **Automotive Engine Rebuilder's Association (AERA)** Feb 2020 — Feb 2020
CylinderHeads and Engine Machinist Orange Country

❖ **National Institute of Automotive Service Excellence** Jan 2018 — Jul 2018
