

Sean Foster

Car Mechanic

Los Angeles, United States email@email.com

Profile

A dynamic and meticulous Car Mechanic holding a faultless track record in diagnostics and repairs for high-performance vehicles in the Formula One Circuit. Over a decade of experience in fixing and repairing Ferrari and McLaren model vehicles in highly pressurized settings. Holds a Diploma in Automotive Engineering and is certified as a Master Mechanic for brands such as Toyota, BMW, Audi, and Volkswagen. Strong work ethic with a verifiable record of providing exceptional customer service.

Employment History

Jan 2019 — Present

Los Angeles

Lead Car Mechanic at High Performance Torquing

Served as lead Car Mechanic in a uber large workshop for Honda vehicles, training and mentoring five junior mechanics in diagnostic automation which improved service delivery times by 25%.

- Perform frequent maintenance and status checks on vehicles and trucks
- Check and monitor and refill automotive fluids for example coolant, brake fluid, and oil
- Inspect air filters and fuel filters for debris and replace them if required
- Clean and lubricate engine components with each car service job order
- Inspect and diagnose electrical and mechanical malfunctions with manual and digital diagnostic tools
- Check and inspect electrical systems, batteries and vehicle timing logs
- Replace faulty parts and components

Jan 2017 — Dec 2018

Tampa

Auto Technician at Automate

Responsible for 15 job orders per day and holds a zero-call back ratio on all jobs completed in the last quarter.

- Inspect and recalibrate brakes and replace when required
- Remove old sparkplugs and new ones
- Check for correct air pressure in tires, wheel alignment, and wheel balancing
- Tighten or replace screws nuts and bolts and dismantle engine components to look for malfunctioning parts
- Extract and remove faulty parts using pliers, screwdrivers, hydraulic lifts and wrenches
- Follow service specifications and instructions for each model and make of vehicle being serviced
